Peter Hesoun et al. : Attorney Docket No.: 35947-231351
: :
Application No.: 10/581,318 : Art Unit: 3744
: :
Filed: June 2, 2006 : Examiner: J. Ford

Title: MODULAR HEATING SYSTEM FOR LARGE VEHICLES

RESPONSE TO ELECTION REQUIREMENT

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In response to the election requirement issued March 10, 2009, Applicants elect the species shown in Fig. 1, with the fan placed below the heat exchanger and with the fan in an axial position.

Applicants traverse the election requirement on the basis that unity of invention exists among the claims. This is borne out by the previously submitted International Preliminary Report on Patentability which does not include any indication of lack of unity of invention at page 1, section 4, where lack of unity would be indicated. Additionally, page 3 of the International Preliminary Report on Patentability indicates that the documents cited by the Examiner represent the general state of the art and that the invention recited in the claims is novel and non-obvious in view of the documents. The modular nature of the system provides great flexibility in installation of the components of the system that is not disclosed or suggested

by the cited documents.

In conclusion, Applicants respectfully request withdrawal of the election requirement and examination of all pending claims.

If an interview would advance the prosecution of this case, Applicants urge the Examiner to contact the undersigned at the telephone number listed below.

The undersigned authorizes the Commissioner to charge fee insufficiency and credit overpayment associated with this communication to Deposit Account No. 22-0261.

Respectfully submitted,

Date: April 10, 2009
